Pricing Information: Custom Rigid Vinyl Signs

Computing Square Inches: To price a custom sized rigid vinyl piece determine the square inch size of the item by multiplying the length in inches by the depth in inches. For irregular shapes draw a rectangle around the entire item and use the dimensions of the rectangle for the length and depth. Locate the appropriate pricing row for the determined square inch size and the desired material and follow the line across the page to the desired quantity. The first line pricing shown is for one color copy on the listed item and includes simple typesetting. Camera-ready art is required for all logos, and extra costs for complicated art (line drawings, excessive copy, special stylized copy, halftones, etc.) will be invoiced. Pricing for each additional color must be added, and process color images require a custom quote.

9405: White Rigid Vinyl & 9410: Clear Rigid Vinyl

A heavy duty, clear or gloss white plastic (.015" thick) for high quality signs, special charts, instruction cards, etc. Good where durability is essential. Can be film laminated for added protection against abrasion and corrosives (contact factory). Also available in thicknesses of .010", .020" or greater. Contact factory for pricing.
